EDUCATION

PES University

2025 - 2029

B.tech - Computer science and engineering

AWARDS & CERTIFICATIONS

- DP World Hackathon '26 (BITS Pilani) Winner
- HCL Tech x PESU Ideathon Winner
- Runner up in HAIL coding challenge

SKILLS

- Python, C, C++ (Competitive Programming)
- Git, Node.js, macOS Systems Management, DNS Configuration
- Network Infrastructure, AdGuard Home (Network-Wide Sinkhole), Browser Fingerprint
- Object-Oriented Programming (OOP)
- Problem-solving skills

PROFILE

Forward-thinking and highly motivated B.Tech student targeting a Software Engineering Internship. Combines a rigorous academic foundation in Physics, Chemistry, and Mathematics with practical, hands-on experience in modern programming, network infrastructure, and algorithm optimization. Proven ability to thrive in high-pressure, fast-paced environments, demonstrated through top-tier placements in national hackathons and ideathons. Adept at leveraging strong problem-solving skills, leadership, and cross-functional team collaboration to architect scalable and innovative technical solutions.

PROJECTS & EXPERIENCE

INDEPENDENT TECHNICAL PROJECT

Local Network Security Infrastructure

Feb 2026

- Engineered a robust, network-wide ad-blocking infrastructure, reducing local network latency and filtering malicious tracking requests across all connected devices, by deploying and configuring AdGuard Home on a dedicated secondary server.
- Optimized traffic flow and enhanced privacy configurations, resulting in a zero-configuration experience for end-user devices, by manipulating DNS settings and managing browser fingerprints at the router level.

INDEPENDENT TECHNICAL PROJECT

Automated Log Analysis & Anomaly Detection System

MAY 2026

- Engineered an automated log parsing pipeline, reducing manual incident investigation time by 40%, by utilizing Python's re (Regex) module to filter and categorize over 10,000 log entries per minute
