

SAKSHI THOMBRE

[LINKEDIN: SAKSHI-THOMBRE](#)

PROFILE

Motivated first-year engineering student seeking a Software Development Internship to apply programming skills, learn industry practices, and contribute to real-world projects

PROJECTS

● Python

AI Study Assistant Prototype (Python, Streamlit)

- Built an AI-powered study assistant prototype using Python and Streamlit
- Designed features for answering study-related queries and improving learning workflows
- Implemented prompt-based interaction and user-friendly interface components
- Gained hands-on experience with AI application development and debugging

Wrote multiple Python programs to solve mathematical and logical problems

Focused on clean logic and efficient solutions

● Java

Developed a console-based application using Java

- Student Record Management System
- Calculator Application
- Menu-Driven Management System
- Basic Banking System

Implemented object-oriented programming concepts

Handled user input and program logic efficiently

● [C]

Developed a menu-driven Data Management System using C

Worked with file handling and structured programming concepts

Implemented record management operations and user interactionBuilt a menu-driven application for handling and maintaining records

📍 Bangalore, Karnataka

EDUCATION

2025-2029

MIT BENGALURU

BTech in Computer Science & Engineering

SKILLS

Languages: Java, Python, C

Core Concepts: Problem Solving, OOP, Basic Programming Concepts

Tools: VS Code, Git

Other: Debugging, Logical Thinking

ACTIVITIES

• Participated in the DP World Hackathon '26 at BITS Pilani Hyderabad as part of LAUNCHPAD 2026

• Collaborated in a team-based 24-hour hackathon to develop innovative solutions for real-world problem statements

• Worked under tight deadlines while improving problem-solving, teamwork, and rapid development skills
